1. Disaster Management in Indian Railways

“Railway Disaster is a serious train accident or an untoward event of grave nature, either on railway premises or arising out of railway activity, due to natural or man-made causes, that may lead to loss of many lives and/or grievous injuries to a large number of people, and/or severe disruption of traffic etc, necessitating large scale help from other Government/Non-government and Private Organizations.”

The Indian Railways is the world’s largest government railway. It is a single system which consists of 65,436 route km of track that criss cross the country, on which more than 20,238 number of trains ply, carrying about 23 million passengers and hauling nearly 2.77 million tonnes of freight every day. Therefore, the safety of operations on the Railways and the safety and security of the millions availing the services of the Railways are of paramount importance. India is vulnerable, in varying degrees, to a large number of natural as well as man-made disasters. Heightened vulnerabilities to disaster risks can be related to expanding population, urbanization and industrialization, development within high-risk zones, environmental degradation and climate change. It can also be related to increase in terrorism around the Globe.

DISASTER DEFINED IN RAILWAYS’ CONTEXT

The concept of a Disaster was not adequately and comprehensively defined on Indian Railways, till the year 2005. It was accepted that a Disaster situation implies, on the railways, to cover only cases of serious rail/train accidents. The definition of Disaster Management (DM) as given by the Government of India was legislated for the first time in the Disaster Management Act, 2005. The broad principles of disaster for any department of the Government changed to the concept of any incident which could not be handled with alone by that department i.e. if it was beyond the coping capacity of a particular department, the incident could be termed as a disaster. With this came the concept of the departments of Government of India as also the State Governments required to join hands to extend whatever facilities were available with them to provide relief/rescue and mitigation on the occurrence of a disaster.

Disaster in the Railway context was traditionally a serious train accident, caused by human/equipment failure, which may affect normal movement of train services with loss of human life or property or both. This is now extended to include natural and other manmade disasters. Different types of disasters are described along with a few examples, below:

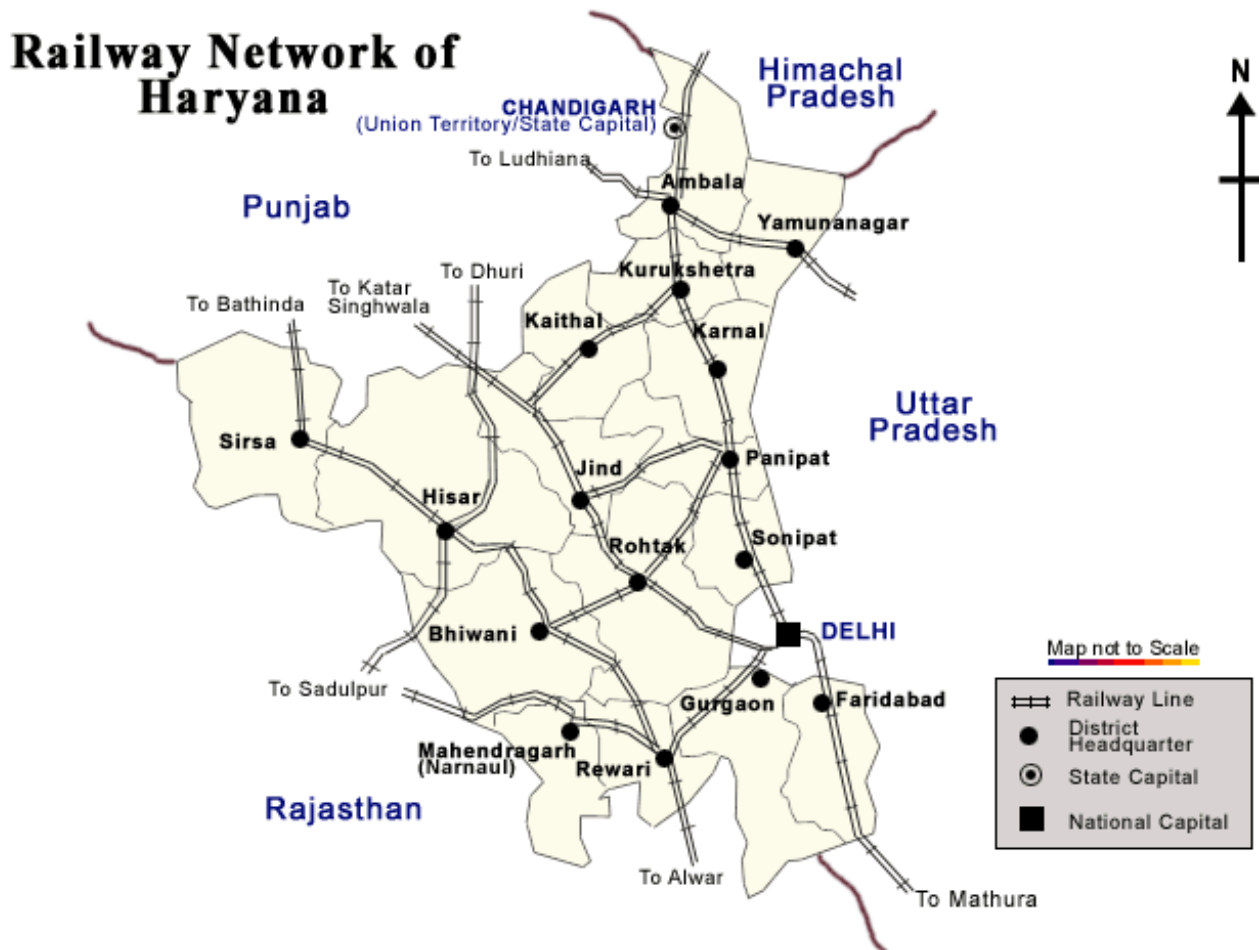

- a) Natural Disaster includes Earthquakes, Floods, Cyclones, Land Slides, Snow Avalanches, Tsunami etc.
- b) Train Accident related Disaster includes Collisions (with a huge number of casualties), Train marooned (flash floods), derailments on a bridge over a river and coaches falling down, train washed away in cyclone, derailment of a train carrying explosives or highly

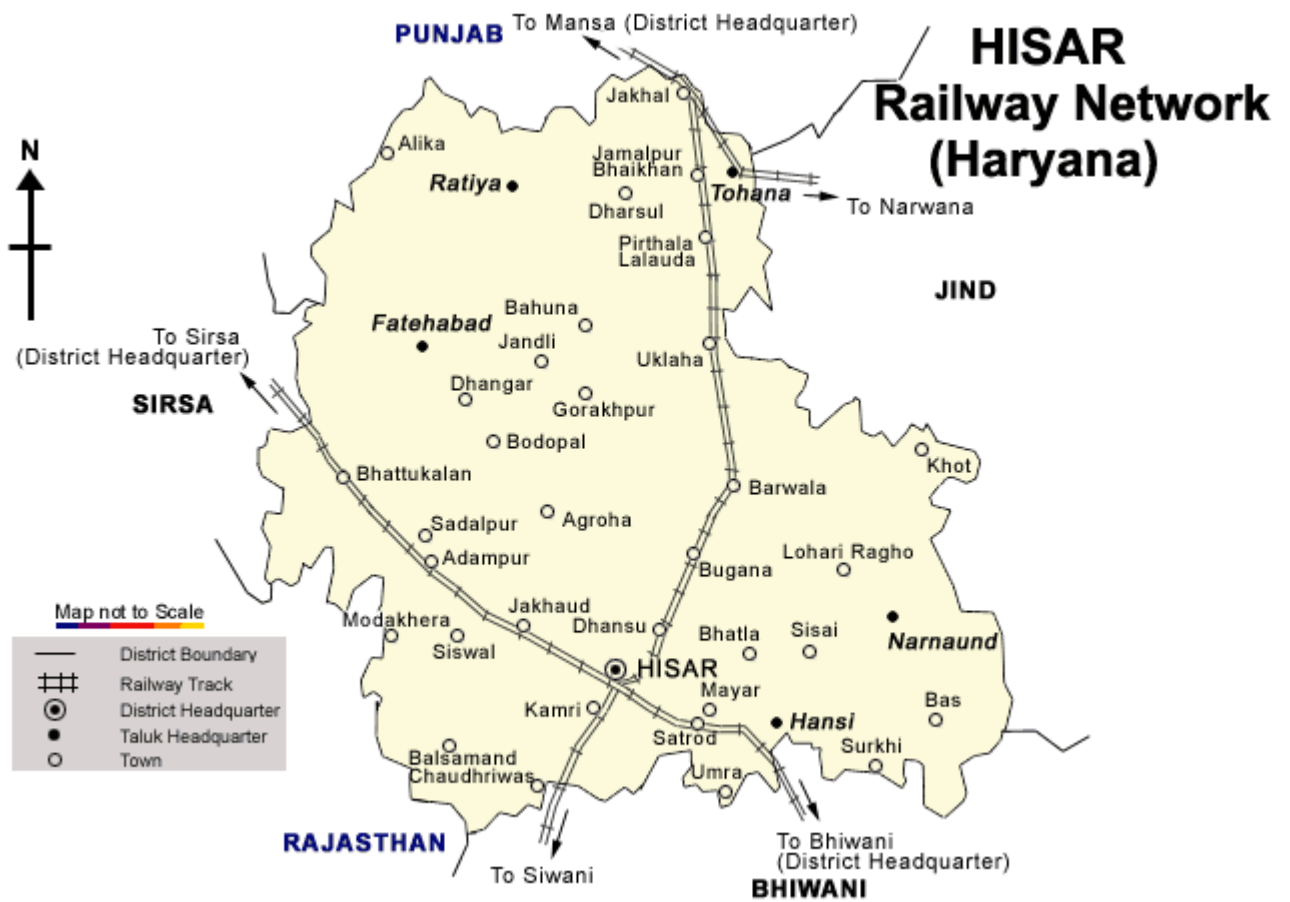

inflammable material, tunnel collapse on a train, fire or explosion in trains, and other miscellaneous cases etc.

c) Manmade Disasters covers Acts of Terrorism and Sabotage, i.e. causing deliberate loss of life and/or damage to property, which includes Setting a Train on fire, Railway installations etc., bomb blast at Railway Station/Train, Chemical (Terrorism) Disaster, Biological, Radiological and Nuclear Disaster.

Hisar Railway Station:-

Hisar is a railway junction, and it falls under Bikaner division of North Western Railway Zone. The first railway line to the city was laid down in 1883 when Delhi Rewari Railway was extended to Bhatinda. The railway station is a part of Western Dedicated Rail Freight Corridor according to which the city is to be developed as an export-oriented industrial units. The city is well connected to Delhi, Punjab, Rajasthan and Jammu and Kashmir through rail links.

4. Mock-Drill

Mock drills are the way of testing the Railway Station Disaster Management Plan. The mock drill on earthquake, fire, etc. should be conducted once in every six months, and the deficiencies should be assessed for the purpose of updation of the plan. This section of the plan should clearly indicate the steps to be followed to conduct the mock drills and the responsibilities of the teachers, non-teaching staff and students should be delineated. If required, the Railway Station authorities should invite the Fire Service Officers, doctors from Health Department, trainers from Red-Cross Society trained Civil Defence volunteers and volunteers from NGOs for support in conducting the mock drills.

Earthquake drill:

1. Practice drop, cover and hold.
2. Once evacuation starts, evacuate people in less than 10 minute without pushing and falling.
3. Evacuate Railway Station in less than 4 minutes using different exits.
4. Look out for nears and dears
5. Stay away from weak areas / structures.
6. Perform head counts when reach at assembly area.
7. Help those who need assistance

Fire Drill:

1. Evacuate from the site.
2. Practice Stop, Drop and Roll in case your clothes catch fire.
3. Cut off electricity from main switch and remove or close down gas connections.
