### **Introduction:**

Its a comprehensive disaster management plan which not only focuses on accidents, but on a whole range of disasters including terrorist acts and natural disasters. The plan, which has been made, has worked out for the prevention of such situations like increased rush at stations during festivals or floods and earthquakes.

The Disaster Management Plan, which conforms to the guidelines of the National Disaster Management Authority (NDMA) and the Disaster Management Act 2005, relies for prevention, mitigation and rescue and relief.

**Rohtak** is a city and the headquarters of Rohtak district in the state of Haryana. It comes under National Capital Region and is just about 70 km north east of Delhi, the capital city of India. Rohtak is a railway junction which belongs to Delhi division of Northern Railway Zone. It is perched on Bathinda –Delhi rail line. ROK is the station code of Rohtak Jn. Rohtak is an Industrial Model Township developed by Industrial and Infrastructure Development Corporation of Haryana state. Other places of interest located near Rohtak are Bhiwani, Hansi, Gurgaon, Panipat etc. Punjab Mail (Mumbai CST-Firozpur Cant), Jabalpur-Jammu Tawi Exp, Shri Gangasagar- Delhi Intercity Exp, Nanded-Shri Gangasagar Exp, Gorakhpur-Hisar Exp, Howrah-Shri Gangasagar Exp, Dauldhara Exp (Pathankot-Delhi) and many other trains stop at Rohtak Railway Junction. The town of Rohtak is also connected by several state and national highways to other parts of the country. Indira Gandhi International airport serves to be the nearest major airbase to Rohtak.

## 2. CONCEPT OF DISASTER ON RAILWAYS

**“Railway Disaster is a serious train accident or an untoward event of grave nature, either on railway premises or arising out of railway activity, due to natural or man-made causes, that may lead to loss of many lives and/or grievous injuries to a large number of people, and/or severe disruption of traffic etc, necessitating large scale help from other Government/Non-government and Private Organizations.”**

**Disaster Risks in India :**India is vulnerable, in varying degrees, to a large number of natural as well as man-made disasters.58.6% of the landmass is prone to earthquakes of moderate to very high intensity; over 40 million hectares (12% of land) is prone to floods and river erosion; of the 7516 km long coastline, close to 5700 km is prone to cyclones and tsunamis; 68% of the cultivable area is vulnerable to drought and hilly areas are at risk from landslides and avalanches. Vulnerability to disasters/emergencies of Chemical, Biological, Radiological and Nuclear (CBRN) origin also exists. Heightened vulnerabilities to disaster risks can be related to expanding population, urbanization and industrialization, development within high-risk zones, environmental degradation and climate change. It can also be related to increase in terrorism around the Globe.

### **DISASTER DEFINED IN RAILWAYS’ CONTEXT :**

The concept of a Disaster was not adequately and comprehensively defined on Indian Railways, till the year 2005. It was accepted that a Disaster situation implies, on the railways, to cover only cases of serious rail/train accidents. The definition of Disaster Management (DM) as given by the Government of India was legislated for the first time in the Disaster Management Act, 2005. The broad principles of disaster for any department of the Government changed to the concept of any incident which could not be handled with alone by that department i.e. if it was beyond the coping capacity of a particular department, the incident could be termed as a disaster. With this came the concept of the departments of Government of India as also the State Governments required to join hands to extend whatever facilities were available with them to provide relief/rescue and mitigation on the occurrence of a disaster

Disaster in the Railway context was traditionally a serious train accident, caused by human/equipment failure, which may affect normal movement of train services with loss of human life or property or both. This is now extended to include natural and other man made disasters. Different types of disasters are described along with a few examples, below :

a) Natural Disaster includes Earthquakes, Floods, Cyclones, Land Slides, Snow Avalanches, Tsunami etc.

b) Train Accident related Disaster includes Collisions (with a huge number of casualties), Train marooned (flash floods), derailments on a bridge over a river and coaches falling down, train washed away in cyclone, derailment of a train carrying explosives or highly inflammable material, tunnel collapse on a train, fire or explosion in trains, and other miscellaneous cases etc.

c) Manmade Disasters covers Acts of Terrorism and Sabotage, i.e. causing deliberate loss of life and/or damage to property, which includes Setting a Train on fire, Railway installations

etc., bomb blast at Railway Station/Train, Chemical (Terrorism) Disaster, Biological, Radiological and Nuclear Disaster.

**Strengths of the Railways to handle a Disaster :-**

In handling disasters, Indian Railways is in a unique position as it has a number of strengths not available with many other departments of Government of India. These include:

- Railways' own Communication Network.
- Operating Control on each Division linked with each Station.
- Territorial Army Units.
- Uniformed force of RPF/RPSF
- Railways' own Medical Infrastructure
- Civil Defence Organization
- An army of Gang men spread out all over the Indian Railways.
- Scouts and Guides (they can at best provide background support).
- Dedicated Rescue/Restoration and Medical Equipment on Rails.
